Dr. Daniel Levine  
PuzzleWise  
P.O. Box 28312  
Bellingham, WA 98228

Dear Dr. Levine,

I am writing this letter as a thank you for your Science PuzzleWise resource. Our school, Fall City Elementary, has enjoyed great success on state standardized tests. In science this past spring our school had the most students either meeting or exceeding standard in the state (92.4%). Our science score is actually in the top five percent of all schools at all levels in the state. The results were immediate; we realized a 22% increase in our state test scores within the first two years of adopting Science PuzzleWise. Over the past four years we have scored in the top 10 percent or higher in the area of science.

Our staff attributes much of our success to the PuzzleWise science resource! We have found that the PuzzleWise resource has filled a void for our school. Your well planned spiraling activities, articles, and especially the vocabulary exercises have helped our students develop a strong foundation in the area of science. Teachers have found that using PuzzleWise during class time has helped them further individualize lessons to meet the specific needs of each student. In addition, our staff feels that using PuzzleWise has helped our school capitalize on our students' time at home with meaningful homework activities.

In addition to the comments listed above, it is evident that your company is committed to keeping costs down so that all students can benefit from this valuable resource. We have never seen an elementary science resource that is more closely aligned to both state and national standards than Science PuzzleWise. My staff and I would recommend PuzzleWise to any school looking to develop a strong core in the area of science. Thank you for your commitment to quality education, and thank you for PuzzleWise!

Sincerely,

Dan Schlotfeldt, Principal  
Fall City Elementary School
